Reviews

Great electronic book and useful one. It can be written in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

From any given point?in a straight line, to erect a perpendicular; or, to make a line at right angles with a given line. On each side of the point A, from which the line is to be made, take equal distances, as A b, A c; and from b and c as centres, with any distance greater than b A, or c A, describe arcs cutting each other at d; then will the line A d be the per-pendicular required. 2. When a perpendicular is to be made at or near the end of a given line. With any convenient radius, and with any distance from the given line A b, describe a portion of a circle, as b A c, cutting the given point in A; draw, through the centre of the circle n, the line b n c; and a line from the point A, cutting the intersections at c, is the perpendicular required.
