The phenomena of growth are independent of the cerebrum and cerebellum. The numerous instances of well-grown acephalous infants, which have reached foetal maturity, sufficiently establish that uterine growth at all events is as efficiently performed without as with those organs. And in the instance which I have quoted, in which life continued in such a being between three and four days after birth, no bodily function was manifestly out of order. Cases of idiotcy tend to confirm the same conclusion. The cerebral organs have been incomplete, reason has not had space for development, but the bodily functions have been perfectly performed. In the progressive scale of organization, there are no facts that point distinctly either way. But it is a singular characteristic of fish, in which the cerebral organs are specially rudimentary, that their increase of size seems comparatively indeterminate. LXVI. The healthy nutrition of...
