Excerpt: . . . 11 Human cloning would also represent a giant step toward the transformation of begetting into making, of procreation into manufacture (literally, handmade), a process that has already begun with in vitro fertilization and genetic testing of em-bryos. With cloning, not only is the process in hand, but the total genetic blueprint of the cloned individual is selected and determined by the human artisans. To be sure, subsequent development is still according to natural processes; and the result-ing children will be recognizably human. But we would be taking a major step into making man himself simply another one of the man-made things. How does begetting differ from making In natural procreation, human beings come together to give existence to another being that is formed exactly as we were, by what we are -...
